

Abandoned man-hole cover connected to old sewer trench per City. Levels as high as 170 ppm PID; and reportedly over 300 ppm.

NOTE: Base Map Provided by Remedy, Inc.

**OLD SEWER TRENCH:** Threatening locales at least from 89 W. Center Street south to 100 South; east along 100 South to alley way at approximately 28 West; and thence north along alley way behind theater terminating at old bathroom plumbing in Gunnison Valley Bank basement. Impromptu pneumatic pump test conducted by Remedy and Wasatch while testing vapors at manhole cover proved pneumatic connection between SVE Unit, plume and sewer trench (11/19/2007).
