

ATTACHMENT 8 - HEALTH AND SAFETY PLAN

The Permittee shall create a site-specific Health and Safety Plan for workers based upon the wastes to be treated. Since the Plan is written for the specific wastes and munitions, its content will not be placed within this Permit document. However, the contents of the Plan are enforceable as if the narrative is within this Permit document. The Health and Safety Plan for each treatment campaign shall be Attachment 8 of this Permit.

The Health and Safety Plan must be written. The Health and Safety Plan must be on-site at all times. The Health and Safety Plan must be complete and finalized before any wastes are treated. All site personnel must be trained on the content of the Health and Safety Plan prior to treating waste.

The Permittee may change the conditions within the Health and Safety Plan without a modification to this Permit. However, personnel must be trained on the changes to the Plan before waste is treated.
